

Specialists working in our health centre

In the Polish Family Health Care Centre there are Polish doctors with many years of medical practice. Our doctors hold PhD degrees and they treat each patient with a sense of care and engagement. Currently the following doctors work in our health centre:

Doctor RENATA BARANOWSKA

PhD, 2nd degree specialist of pediatrics and allergology

She graduated from Medical Academy in Wroclaw (Poland) in 1984. She passed all of her specializations and got a PhD degree with distinction also at Wroclaw Medical Academy. She also graduated from postgraduate studies in the field of Health Economics at Warsaw University. For 3 years she worked at the Specialist Mother and Child Health Care Centre in Wroclaw. From 1997 to 2007, she worked in Gryfice (Poland) in the Regional Hospital (for the last six years, as the Director head of the childrens' division).

She has a broad experience treating sick children and in preventive care. From 1999 she ran a specialist allergies treatment dispensary covering full diagnosis and immunotherapy.

She consistently improves her competences taking part in numerous courses and conferences. She has taken part in multiple international clinical studies. She is author and co-author of many scientific publications and a member of a number of Polish and foreign Scientific Societies.

She is the founder of the "Pomóż Dorosnąć" ("Help to grow") Foundation which while overseeing the Children's well equipped department in the regional hospital of Gryfice (Poland) led to the creation of a fairy Tale theme winning the "Butterfly Hospitals" competition organized by the "Porozumienie bez barier" ("Communication without barriers") Foundation founded by Jolanta Kwaśniewska.

Her specialization and general practice is registered under Irish Medical Council No. 310711.

Doctor KAJETAN BARANOWSKI

PhD, 2nd degree specialist in preservative dentistry and 1st degree in general dentistry

He graduated from Medical School in Wroclaw (Poland) in 1987. He passed all of his specializations and PhD degree with distinction also in Wroclaw.

For 5 years he worked in the regional outpatients' surgery in Trzebiatów (Poland). For the last 25 years he has been running private dentist surgery. From 2003 to present he has ran as the owner and director of a national health institute which offers general health protection, Specialization Dispensaries and multiprofile dentistry activities.

He is the author and co-author of many scientific publications. For the last two terms of office he has been Vice-Chairman of the Polish Dental Society in Szczecin (Poland) and a member of many Polish and foreign Scientific Societies. He regularly takes part in numerous courses and conferences. In 2004, in the Managing Personnel Education Centre in Poznań (Poland), he was granted a Manager Certificate for managing personnel with excellent results in the area of „Modern techniques and methods for enterprise management“.

He is the chairman of the "Pomóż Dorosnąć" ("Help to grow") Foundation, which while performing patronage over the Children's Department in the hospital in Gryfice (Poland) led to the creation of a fairy tale department and won the "Butterfly Hospitals" competition.

He holds his registration in the Irish Dental Council.

GRAŻYNA WODYŃSKA

General Practitioner, Laryngologist, 2nd degree specialist in ENT

She graduated from the Medical University in Gdansk, where she obtained two degrees of specialization in ENT

For many years she served patients in ENT Ward at a District Hospital in Gdansk where she worked with both infant and adult patients. She also worked for a private clinic and "Swissmed" hospital.

Dr. Wodynska has attended many conferences, discussions and symposia. She speaks English and German fluently and can also speak conversational Italian and Russian.

BOŻENA SUCHCICKA

GP with special intrest in Dermatology

She graduated in 1988 from Medical University in Gdansk. She was enrolled onto a postgraduate practice in 7th Polish Navy Hospital and then she started working for a District Hospital in Gdansk at a Dermatology Ward. She obtained first and second degree in Dermatology and Venereology respectively in 1992 and 1999.

In the year 2000 dr. Suchcicka changed her employer to a District Hospital for Infectious Diseases where she gained experience regarding diagnosing and treatment of skin infectious diseases. In the years 2004-2007 she worked for a main District Hospital of Specializations and in private clinics 'Swissmed' in Gdansk running her own practice alongside. Dealing with so many patients with variety of health problems at the same time consolidated her confidence and experience as a specialist.

She took part in many conferences and postgraduate courses in Dermatology, Venereology and Aesthetical Dermatology. She is also a long time member of Polish Dermatological Society and activist for 'Fala Nadziei' a society established to help people suffering from psoriasis.

MAKBUL AHMED

PhD, 2nd degree sopecialist in gynaecology and obstetrics

He graduated from Medical University in Łódź (Poland) in 1982. He was enrolled onto a postgraduate practice in SPZOZ in Tomaszow Mazowiecki. Working in this hospital in the years 1986-2000, assisting PhD Eugeniusz Zejda he obtained first and second degree in gynaecology and obstetrics.

In 1997, assisting Professor Waclaw Dec he obtained PhD in Gynaecology and Obstetrics. Thereafter he worked as the head of Gynaecology and Obstetrics Ward in Oleck and Żagań.

Between 2004-2008 worked as a gynaecology and obstetrics consultant in University Hospital in Polokwane Mankweng Hospital Complex in Limpopo Province in South African Republic. This experience helps him enrich his practical and theoretical knowledge. As a consultant, besides teaching students and younger doctors, he was responsible for carrying on and implementing university researches. He's an author of 10 scientific articles.

I treat my occupation as a challenge and do it with passion. The relationship between the doctor and the patient I always guide by the overriding principle of mutual trust and understanding. In taking decisions, diagnosing and treatment method, you could always participate.
